

```
std::integral_constant  
< std::size_t, std::extent  
  < T, N-1 >::value >
```

```
extent< T[I], N >
```

A diagram showing a central box labeled 'extent< T[I], N >' with two blue arrows pointing to two separate boxes on the left. The top box contains 'std::integral_constant < std::size_t, std::extent < T, N-1 >::value >' and the bottom box contains 'gxx::integral_constant < gxx::size_t, gxx::extent < T, N-1 >::value >'.

```
gxx::integral_constant  
< gxx::size_t, gxx::extent  
  < T, N-1 >::value >
```
